

**RUSSIA: 8D7N WINTER LAKE
BAIKAL TOUR**

俄罗斯：8D7N贝加尔湖冬季团

OVERVIEW

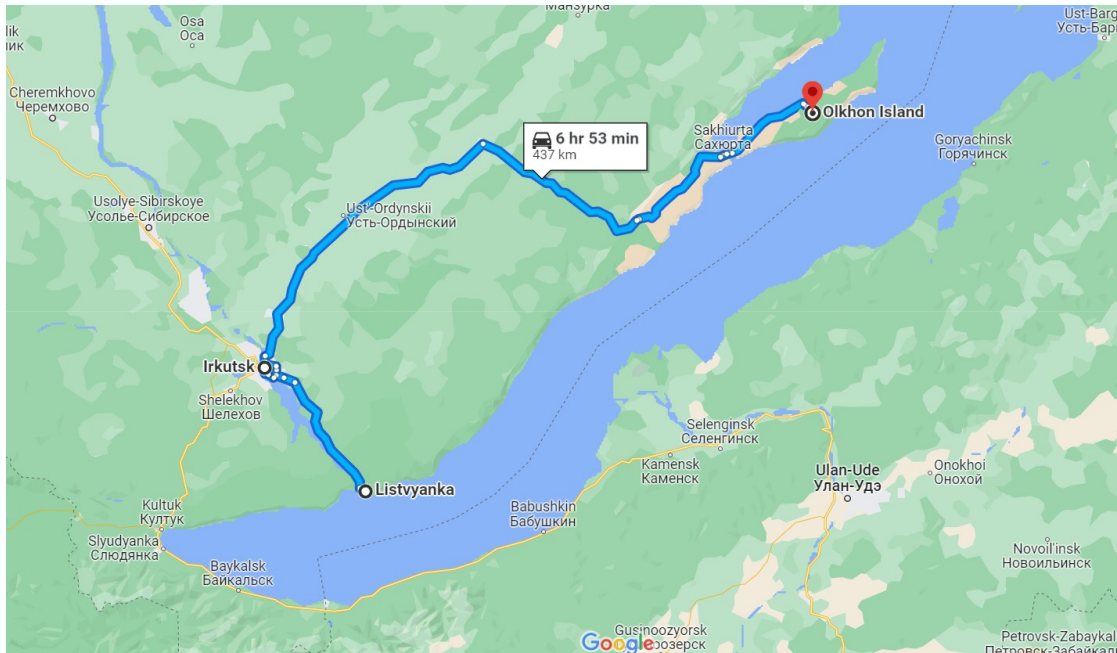

THIS TOUR IS SUITABLE FOR:

- Someone who is into winter travel.
- Someone who is into Mother Nature

Lake Baikal, a true wonder of nature located in the southern part of Siberia, Russia, is the largest volume freshwater lake in the world, boasting a breathtaking landscape and unique underwater world. During winter, temperatures plummet to extreme levels, causing the lake's surface to freeze over, creating a mesmerizing solid ice surface. This icy expanse is thick enough to support the weight of cars, allowing them to drive across it, while adventurous individuals can walk upon it, experiencing the sensation of gliding on a magical ice sheet. The purity of the water gives the ice a stunning crystalline quality, providing a glimpse into the depths below. On this tour, you will not only behold the beauty of the frozen Lake Baikal but also immerse yourself in the captivating local culture and witness the vibrant life that thrives in the surrounding communities of the lake.
